BUILD YOUR OWN

Custom built software solutions for HPE Content Manager

Kapish designs and develops custom software solutions to ensure your business gets the most out of HPE Content Manager (HPE CM). Our highly skilled consultants and software developers analyse your organisation's current processes and requirements and develop a solution that is tailored specifically for your needs.

Custom Development Samples

Kapish HPE CM Action Tracking Reports

Report on HPE CM Actions in a simple and easy to use interface. Bring to life statistics in a huge array of reports types and formats. HPE CM Action Tracking Reports take all the information from HPE CM actions and procedures and formulates them into easy to understand and analyse reports and graphs. KPIs are effortless with Kapish HPE CM Action Tracking Reports, presenting action statistics by Organisation, Groups, People, Action Types or Dates. Report in real-time on fundamental business processes and act on the information in a timely fashion.

Kapish HPE CM Project Management Tool

Need to create the same set of folders and documents as the backbone for all your new projects in HPE CM? Want to easily assign the Project Team and Managers to this project structure with a few simple clicks? The Kapish Project Management Tool was custom designed especially to do just that. The standard project folder structure is created for the user when they create the top-level Project folder, then the Kapish HPE CM Project Management Tool goes to work and creates all the sub-folders and template documents within the project folder automatically.

Enforce naming conventions and apply security automatically to each and every corporate project folder with no additional work or effort for the end users.

Benefits of integrating business applications with HPE Content Manager

- Increase in data accuracy and reduction of out-of-date information
- One-click access to information stored in other systems
- Storing documents in a controlled environment, version control, retention, security etc
- Minimise duplication of effort, by not double handling information
- Access to more information from the one interface
- Reduction in time spent moving between business applications
