KAPISH EXPLORER

Jumpstart Implementation

The Jumpstart Implementation is designed to get you up and running with Kapish Explorer in just three days. The package includes workshops and training to ensure your Micro Focus Content Manager Administrators and IT staff understand the configuration and deployment options available with Kapish Explorer, and an end user training course for a pilot group of users.

Kapish Explorer takes the functionality of CM and delivers it within the more familiar and user friendly interface of Windows Explorer. It minimises the impact of change management by empowering users to leverage off their existing knowledge of Windows Explorer, and in turn reduce the complexity of CM allowing users to work smarter and not harder.

A Jumpstart Implementation includes the following:

Day One:

Global Setting Configuration Workshop

Kapish will conduct a workshop with your Content Manager Administrators, outlining the Kapish Explorer global configuration options to determine how they can be used to benefit your organisation.

Custom Search Form Training Course

Kapish will deliver a training course for your CM Administrators covering the Kapish Explorer Administration functions, including developing and managing custom search forms.

Day Two:

Initial setup and testing in Development environment

Kapish will work with your CM Administrators and IT staff to implement and test the desired Kapish Explorer configuration settings, including custom search forms, within your Development environment.

Assist IT Staff in deploying Kapish Explorer to a Pilot Group

Kapish will work with your IT staff to package and deploy Kapish Explorer to a pilot group of users.

Day Three:

Implement the configuration into Production environment

Kapish will work with your CM Administrators and IT staff to implement and test the desired Kapish Explorer configuration settings, including custom search forms, within your Production environment.

Kapish Explorer End User Training Course

Kapish will deliver a Kapish Explorer End User training course to a pilot group of users.
