

Kapish

Business Transformation Management

Transform Complexity into Clarity.

Business Transformation Management

Kapish is a trusted transformation partner to 80+ organisations across Australia and New Zealand, helping organisations reduce complexity, improve decision-making and successfully deliver change at scale.

Our Business Transformation practice provides a holistic view across people, processes, data and technology, enabling organisations to align strategy, investments and operations to achieve meaningful business outcomes.

Technology Partners

Turning strategy into action and complexity into clarity.

Ardoq | Kapish Gartner Attendee Offer

Transformation Readiness Briefing

A private, executive-level briefing designed to help leaders pressure-test a priority transformation challenge, sharpen investment decisions and identify the conditions required for measurable delivery confidence.

Turn one strategic challenge into a sharper executive conversation.

Gartner gives executives access to ideas, analysts and peer insight. The real value comes from translating those ideas into decisions that are relevant to your organisation's strategy, maturity and operating reality. Kapish is inviting selected attendees to book a focused Transformation Readiness Briefing before, during or immediately after the event.

In 45 minutes, we will help you examine a live transformation, architecture, process, application portfolio, cost governance or AI governance challenge through an executive decision lens – clarifying where visibility is strong, where risk is hidden, and where focused action could create the greatest value.

Exclusive Gartner Attendee Offer

What attendees receive:

- A private 45-minute executive briefing with Kapish transformation, EA and process specialists.
- An executive readiness scan across governance, architecture, portfolio, process, cost or AI.
- A decision-quality opportunity map highlighting where to reduce risk and accelerate value.
- A pragmatic value pathway identifying quick wins, capability gaps and next-step options.
- A concise executive follow-up note summarising key observations and suggested actions.
- Optional platform walkthrough of Ardoq, Signavio, Apptio or Cloudability.

Track	Best for leaders asking...	Executive value lens
Transformation Visibility	"Do we understand impact and risk across our transformation portfolio?"	Confidence in direction, sequencing and governance rhythm.
Enterprise Architecture Value	"Is our architecture practice delivering enough value?"	Confidence architecture is shaping strategy and investment.
Process Performance	"Where are processes slowing us down or creating risk?"	Clearer view of friction, cost and delivery impact.
Technology Cost & Investment	"Can we connect technology spend to business value?"	Better cost transparency and funding prioritisation.
AI Governance	"How do we enable AI adoption without uncontrolled risk?"	Practical visibility, ownership and risk guardrails.

Why speak with Kapish?

- Executive-first, not tool-first: we start with your strategic discussion, not a demo.
- Tailored to your maturity: we adapt to your organisation's context and appetite for change.
- Sharper insight: we connect strategy, capability, process, cost and risk into one view.
- Accelerated time-to-value: practical advice focused on confidence and next best action.
- Proven expertise: Kapish supports organisations across Australia and NZ in EA, process and IT finance.
- Tool-enabled, outcome-led: we work across Ardoq, SAP Signavio, IBM Apptio and IBM Cloudability.
